

Abhishek D K

Full Stack Developer | 2.7 Years Experience

Mangalore, India | abhidk62@gmail.com | [+91-7012913159](tel:+91-7012913159) | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

Skills

Languages: TypeScript, JavaScript

Frontend: React.js, Next.js

Backend: Node.js, NestJS, Express.js

Databases: PostgreSQL, MongoDB, MySQL, Redis

Architecture & APIs: REST, GraphQL (Apollo Server), Swagger / OpenAPI, Clean Architecture

State Management: Redux Toolkit, Zustand, Context API

Authentication & Payments: JWT, OAuth 2.0, Passport, bcrypt, PayPal, Razorpay

Real-time: WebSockets, Socket.IO, WebRTC, GraphQL Subscriptions

Messaging & Jobs: RabbitMQ, BullMQ

DevOps & Infrastructure: Docker, Nginx, Load Balancing, Cloudflare, AWS (EC2, S3), GitHub Actions (CI/CD)

Tools: Git, Postman, Vite, Jest, ESLint, Prisma ORM, Mongoose

Experience

Full Stack Developer, Automax Solutions India Pvt Ltd, Kochi

January 2025 – Present

- Developed full-stack features using **Next.js** and **NestJS** with **Node.js** for production web applications.
- Built **Next.js** (v16) dashboard with reusable responsive components and protected session-aware routing using **Zustand**.
- Integrated **GraphQL** APIs with typed codegen and **Apollo** WebSocket subscriptions for real-time live-auction updates, including client-side PDF generation (**jspdf**) and Cloudflare Turnstile verification.
- Built **REST** and **GraphQL** APIs integrating **WhatsApp Cloud API**, **Firebase FCM**, cloud storage (**AWS S3**, **Google Cloud Storage**), and third-party APIs using **Axios**; implemented logging/monitoring (**Winston**) and file/document processing (**Multer**, **Sharp**, **XLSX**, **PDF**, **PPTX**, **ZIP**).
- Implemented secure authentication and API protection (**JWT**, cookie-based sessions, Cloudflare Turnstile, **Redis**-backed rate limiting) and background job processing with **BullMQ** for bulk messaging and scheduled tasks.

Full Stack Developer, Syntra Labs Pvt Ltd, Remote

November 2023 – December 2024

- Developed full-stack web applications using **React.js**, **Node.js**, and **Express.js**, building responsive dashboards, reusable UI components, and secure session-aware routing with **Zustand**.
- Built and integrated scalable **REST APIs** with real-time messaging and live updates using **Socket.IO**; worked with cloud storage services like **AWS S3** and third-party API integrations using **Axios**.
- Implemented secure authentication and API protection using **JWT**, cookie-based sessions, and **Redis** for caching and performance optimization in production applications.

Projects

Cineora – Movie Ticketing App (Next.js + TypeScript + Redis + MERN Stack)

[GitHub](#)

- Built full-stack movie ticketing platform with **Next.js** SSR frontend and **Node.js/Express** backend, implementing multi-screen theater seat layouts with **CSS Grid** and real-time seat selection using **Socket.IO**.
- Architected multi-tenant backend supporting multiple owners, theaters, screens, and showtimes with complex seat allocation, concurrent booking prevention, dynamic pricing, and **role-based access control** with **QR-based ticket verification** and **Redis** token blacklisting.
- Implemented advanced features including **location-based** nearby theater search, **Socket.IO**-powered real-time

seat blocking and chat, group booking invitation system, notifications, and integrated **Razorpay** payments with **Redux** state management and **Redis** caching for access/refresh tokens.

Stitches – E-Commerce Web App (MERN Stack)

[GitHub](#) | [Live](#)

- Built responsive **React** e-commerce interface using **Tailwind CSS**, **Context API**, and **React Hook Form**, implementing interactive cart and seamless checkout flow.
- Developed secure **RESTful APIs** with **Node.js** and **Express.js** for authentication, product catalog, and order management using **JWT**, **MongoDB**, and integrated **PayPal** payments.
- Optimized frontend performance using **useMemo**, **useCallback**, debounced search, and paginated product listings while managing global state with **Redux** and implementing access/refresh token authentication.

VibeMeet – Video Calling App (NestJS + React.js + WebRTC + Socket.io)

[GitHub](#) | [Live](#)

- Built real-time video conferencing interface with **React.js** featuring **WebRTC** integration for peer-to-peer connections, in-app chat, and user-friendly controls for **mute/unmute** and video toggle and **screen sharing**.
- Architected **NestJS** backend following repository pattern architecture with **Google OAuth** authentication for secure sign-in/sign-up, unique meeting room join IDs, and **Socket.IO** for real-time synchronization.

Real-time Chat App (MERN + Zustand + Socket.IO)

[GitHub](#)

- Built a real-time messaging application using the **MERN stack**, enabling instant communication with **Socket.IO**, efficient global state management with **Zustand**, and a responsive chat interface with **notifications** for seamless message delivery.

Education

Canara College, Mangalore University
Bachelor of Science in Computer Science (B.Sc.)

2019 – 2022

Prototype
MERN Stack

2023
